

During the School Year Scheduling: Secondary Schools

This course will teach you how to use the master schedule and how to modify students' schedules, including enrolling them into special programs and classes, after master scheduling has taken place at the beginning of the school year.

The Master Schedule

The master schedule is a visual representation of who teaches what and when during the current school year. At each school, the master schedule shows the active courses and sections, who teaches them, when and where they meet, and how many students are currently enrolled in each class. It's a handy tool for counselors, registrars, and other school administrators who can benefit from seeing all of this information on one screen.

To view the Master Schedule, click **Master Schedule** on the Start Page.

To edit the Master Schedule Preferences, click **Master Schedule** on the Start Page, then click **Show Preferences**.
